ABOUT ME

Second-year Interactive Media and Immersive Technology student and passionate XR Developer. Dedicated to building engaging VR and AR experiences and engineering smooth, intuitive interactions using modern XR toolkits. A creative problem-solver with a strong foundation in independent game development, constantly experimenting with immersive technologies to bring new digital worlds to life.

EDUCATION

BSc (Hons) in Interactive Media and Immersive Technology with Specialization in VR/AR

Asia Pacific University of Technology & Innovation (APU)

Expected Graduation: Feb 2028

TECHNICAL SKILLS

Engines & Tools : Unity || Unreal Engine || Blender || Maya || Adobe Photoshop CC || Adobe Illustrator CC || Adobe After Effects CC || Adobe Premiere Pro CC || Davinci Resolve

Languages: C# || Python || Unreal Blueprints

Libraries & SDKs : XR Interaction Toolkit || Meta SDK || Hand tracking || OpenXR

PROJECT EXPERIENCE

Astra-Lens “Mixed Reality Application, XRCC 2025 Online Hackathon”

- Co-developed a mixed reality space exploration application utilizing Unity and XRI to make the solar system accessible and interactive within a strict 72-hour development window.
- Managed all 3D models using Blender and wrote the necessary code to ensure planets were fully interactive within the immersive mode.

ADDITIONAL EXPERIENCE

Faceless “2D Game, Global Game Jam 2026”

- Engineered the dynamic attribute switching mechanics and the overarching Sanity system for a 2D hand-painted platformer, using Unity and C#
- Programmed gameplay logic allowing players to swap emotional masks on the fly to alter their speed, jump, and attack stats while managing sanity drain within a strict 48-hour development window.

Where Tides Sleep “3D Game, Game Jam+ 25/26”

- Programmed all core player interactions and scripted in-game activities, including fishing and crafting mini-games, using Unity and C#.
- Collaborated to build the entire nautical-themed voyage project within a strict 48-hour development window.

LEADERSHIP & AFFILIATIONS

APU-ACM SIGGRAPH Student Chapter (APUSSC)

President, “May 2026 – Present”

- Spearheaded the establishment of the university's ACM SIGGRAPH chapter, directing executive operations and organizing technical events to cultivate a thriving campus community dedicated to computer graphics and immersive technologies.

Asia Pacific University Game Development Club (APUGDC)

Head of External Affairs Department, “March 2026 – Present”

- Lead external communications, partnerships, and event coordination, representing the university's game development community.
